# Retail Trends to Look Out for in 2022

Retailers have emerged out from the profound upheavals by embracing new opportunities: the customer-first approach, friction-less shopping, utilizing technology, providing real-time solutions, and many more.

Dr Veenu Sharma
Assistant Professor – Retail and Marketing, Birla Institute Of Management Technology

The massive transformation has been seen in both online and offline operations to recover from the setback by the pandemic Customer habits have evolved and thus the retailers are rewriting their modus operandi to recover from major crises and looking forward to ways to drive their sales.
