

**PGDM / PGDM (IB), 2020-22**  
**Financial Econometrics**  
**DM-312 / IB-312**  
**Trimester – III, End-Term Examination: April 2021**

Time allowed: 2 Hrs 30 Min

Max Marks: 50

Roll No: \_\_\_\_\_

**Instruction:** Students are required to write Roll No on every page of the Answer Sheet. All other instructions on the question paper / notifications should be followed meticulously.

Both the questions given below are compulsory. Each of the questions carry 25 marks each. Use R and submit your html or pdf file after analysis. Put all your analysis in # in the file itself.

1. Table 1 (attached) gives data on real rate of return on common stocks at time (RR), output growth in period and inflation, for the US economy for the period 1954-1981. **(CILO 1, 2)**
  - A. Regress RR on inflation
  - B. Regress RR on output growth and inflation
  - C. Comment on these two and explain can we see autocorrelation in cases like this.
  
2. Table 2 gives the detail of the USA GDP quarterly data from 1947-2007. You are requested to make ARIMA model of the same. Follow the four steps of the model and explain each of them. The steps are identification, estimation, diagnostic checking and forecasting. **(CILO 3, 4)**

Table 12.10

Observatio RR	Growth	Inflation
1954	53	6.7
1955	31.2	2.1
1956	3.7	1.8
