Synopsis

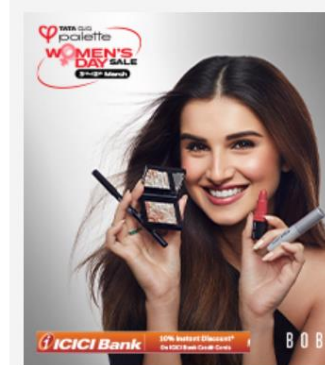

A WHO report indicated that 4.7 million women died from non-communicable diseases in 2012; these deaths were more significant in low-middle-income countries. To add to these was the pandemic-COVID-19, which has added to the woes of women.

India's women live longer as compared to their male counterparts. In 2019 as per World Health Statistics -2022- the life expectancy of Indian women at birth was 72.2 as against 69.5 for males. The healthy life expectancy at birth of women was 60.4 in 2019. However, the maternal mortality rate is significantly worrying for India, i.e., 145 (per 100 000 live births) as of 2017. In a nutshell, women live substantially longer with disabilities.

Here are top 3 hiring trends in the education sector|Explained

Trends of a future callout for a more virtuous population, aware of the vulnerabilities technology is bringing to industry. Their core in understanding it, capturing it and delivering the questioning interdisciplinary solution in the eye of the storm is what makes them the recruiter's right choice. Check the top 3 hiring trends here.

By India Today Education Desk: In recent years, employment for B school graduates has shown positive growth and is above average across the majority of sectors. The IT, BFSI, and Consulting sectors contribute to more than half of the hiring proportion at any B school, with a notable spike in the compensation recently across the sub-continent. 

Education and employability are attached with many balances which act as a means to an end for the B School graduate in terms of returns and career growth.

Know some of the most important hiring trends that are continuing in the HR industry by Rajeev Sharma, Chairperson, Centre for Corporate Relations (CCR) Assistant Professor of Operations and Decision Science, Birla Institute of Management Technology (BIMTECH).

Management placements hit a 5-year high in 2021-22. Salaries are improving too

AICTE data shows 1,20,946 students got placed in management sector in 2021-2022, after a dip in the previous year due to pandemic. Percentage of placements has also improved over the years.

KRITIKA SHARMA 6 March, 2023 10:30 am IST

New Delhi: After a dip during the pandemic, the number of placements in management courses surged to a five-year high in 2021-2022, according to latest data from the All India Council for Technical Education (AICTE).

The upward trend is expected to continue in 2023, going by incoming data from institutions that have released their placement reports so far.

Rajeev Sharma, faculty member, Operations and Decision Science, and chairperson of the Centre for Corporate Relations, at Birla Institute of Management Technology (BIMTECH), said there has been a constant increase in average yearly salary packages awarded during placements post-Covid.

Talking about BIMTECH's placements, he said that in the 2019-21 PGDM batch, an average increase of 16 per cent in salary packages was recorded over the 2018-20 batch. Similarly, the 2020-22 batch witnessed an 18 per cent increase in the average salary from the previous batch, while the 2021-2023 batch saw a 20 per cent hike.

International Women's Day 2023: Most common insurance problems faced by women in India

International Women's Day: It is important for women to become more aware of the need to secure their future and take steps to align their savings and financial protection accordingly, say experts

International Women's Day 2023: The number of insurance buyers in the country has slowly but surely increased over time, but the share of women buying insurance has not increased proportionately. While this may be a reflection of the workforce demographics, according to experts, it is also perhaps true that many women still do not think of insurance as a necessity. There may be various reasons for this, and it is important to understand those and find a solution.

Maya Pandey, Doctoral Researcher at BIMTECH, says that women face some unique health issues like breast cancer, cervical cancer, and osteoporosis to name a few. However, many women are not aware of the need for regular screenings and preventive care. Also, preventive care is barely covered under insurance policies. If the screening reveals any health issue then it is termed as pre-existing disease and not covered or covered with higher premiums. So, therefore women may have pre-existing conditions that make it difficult for them to obtain insurance coverage and if the coverage is provided it would result in higher premiums

UP To Achieve \$1 Tn Mark Soon, Sets Up Initiatives To Attract More Startups

Digital Mission and Startup India have made India a giant among the nations. "Government has established 60 incubators and accelerators in 23 districts that will provide startups mentoring and networking," UP Minister Yogendra Upadhyaya said

The G-20-Digital Innovation Alliance (G20-DIA) has been launched by the Ministry of Electronics and Information Technology to recognise and support innovators that have digital solutions for global impact. The entire initiative will culminate in August 2023 with a Grand Summit in Bangalore, where 174 selected startups and investors will participate.

Harivansh Chaturvedi, Director BIMTECH, said, "Atal Incubation Centre BIMTECH under the leadership of Abha Rishi, CEO, AIC BIMTECH has taken the work of guiding startups to different parts of India in the last four years. It is a matter of prestige that India is holding the G20 Presidency and it is applaudable how the government of India and Uttar Pradesh has related it to build the startup culture in the country. India under NITI Aayog is catching up with the international startup wave and with G20, it will reach greater heights."

"UP will achieve USD 1 trillion economy soon. The government is setting up new initiatives to attract more entrepreneurs and startups. To offer a better ecosystem and to give UP a new vision, the government has established 60 incubators and accelerators in 23 districts," Yogendra Upadhyaya, Minister of Electronics & Information Technology, Minister of Science & Technology, and Minister of Higher Education, Government of Uttar Pradesh said.

There are presently more than 9,000 registered startups in UP, this figure is increasing repeatedly, and more aspiring entrepreneurs are taking part in this. The UP government, under the leadership of Yogi Adityanath has introduced various programmes to make the workforce skilled, especially in artificial intelligence, blockchain and much more.

योगी जी की सरकार में गुंडे मवाली निर्द्वंद नहीं घूम सकते: योगेंद्र उपाध्याय, इलेक्ट्रॉनिक्स एवं आईटी मंत्री, यूपी

ग्रेटर नोएडा (29 मार्च 2023): मंगलवार 28 मार्च को ग्रेटर नोएडा के प्रसिद्ध संस्थान बिमटेक द्वारा "स्टार्टअप कुंभ" का आयोजन किया गया। स्टार्टअप कुंभ में मुख्य अतिथि के रूप में उत्तर प्रदेश सरकार के इलेक्ट्रॉनिक्स एंड आईटी मंत्री योगेंद्र उपाध्याय उपस्थित रहे।

आईटी मंत्री उपाध्याय ने मीडिया से मुखातिब होते हुए कहा कि "समाज को भी साथ खड़ा होना चाहिए क्योंकि जब समाज और सरकार जब मिलेंगी तो निश्चित रूप से क्रांतिकारी परिवर्तन आएंगे।" भारत द्वारा G20 की अध्यक्षता करने को लेकर उन्होंने कहा कि "यह हम सबके लिए गर्व की बात है। इसमें 20 सदस्य देश हैं और 9 देश, कुल 29 देश भाग ले रहे हैं जिनके पास 65 फीसदी इकोनॉमिक पावर है और उससे भी अधिक जनसंख्या है। तो उसका नेतृत्व यदि हमारे नेता कर रहे हैं और उसकी अध्यक्षता हमारा देश कर रहा है तो ये हम सबके लिए गर्व की बात है। विकास को लेकर जब चर्चा होगी और मंथन होगा तो देश को एक नई दिशा मिलेगी।"

Vocational education should begin from schools, says former AICTE director

CHENNAI: The quality of the education given to the underprivileged in the country is poor and rarely one or two students from an underprivileged economic background get admission in IITs and IIMs, said Dr Harivansh Chaturvedi, Former Director of All India Council for Technical Education (AICTE), and an Alternate President of Education Promotion Society for India (EPSI), on Friday.

Talking to *DT Next* on the sidelines of a national conference of Universities and Colleges organised by the Educa-

tion Promotion Society for India in Chennai, Chaturvedi said the Tamil Nadu state tops in the Gross Enrolment Ratio (GER) with 52 per cent. He also praised the Tamil Nadu government and the former chief ministers of the

state for this high-stand reach in the education sector.

Emphasising the need for transformative higher education through coordinated efforts of all stakeholders, he urged Higher Education In-

stitutions to have a global outlook.

“Vocational subjects should have been taught in schools. So that the students can select their careers after schooling. Degrees without knowledge have no value in

the market. The union and state governments should ease the norms for providing educational loans. In India, only 10% to 12% of students get educational loans. The government has to provide scholarships to at least 20%

of students and loans to at least 25% of students. The imbalance in the economy reflects education. In addition to the Medical colleges, engineering and art colleges also get donations from the students,” he said.

The former AICTE director added that since 2012, the traditional subjects like Civil, Mechanical, EEE, and ECE goes down and there is zero enrolments in these courses.

“AICTE has allowed HEIs to start various new courses related to computer science. This will help the HEIs to survive. It has been reported that more than 70% of employees working in the service sector include IT, ITeS,” he claimed.
