EMPOWERING FUTURE LEADERS: BIMTECH COLLABORATES WITH CFA INSTITUTE

BIMTECH, one of India's premier Business

Schools, recently hosted a transformative session for PGDM students in collaboration with the CFA Institute. The event, organised by the FINWIZ Finance Club, featured industry stalwarts Mr Gaurav Kaushik, CFA, Executive Director at Aventus Wealth Management, and Mr Aviral Agrawal from CFA Institute.

The session offered invaluable insights into the evolving investment management landscape, the global relevance of the CFA program, and its benefits for aspiring finance professionals. Students explored the interplay of technical expertise—such as financial modeling, data analytics, and fintech—with critical soft skills like ethical leadership and adaptability.

Interactive discussions and a rewarding quiz engaged students, emphasising the CFA's potential to enhance career prospects. International participants and first-year students actively contributed to the dialogue, gaining clarity on CFA certifications, career pathways, and industry trends.

BIMTECH's AACSB accreditation and robust alumni network underscore its commitment to cultivating global business leaders. Dr Prabina Rajib, Director of BIMTECH, highlighted, "We

aim to bridge theoretical knowledge with industry-aligned certifications, preparing students for dynamic financial markets."

This collaboration affirms BIMTECH's role in shaping future-ready professionals equipped with global competencies in business and finance.
