

PGDM (RM) (18-20)
Supply Chain Management
RM-107

Trimester – I, End-Term Examination: September 2018

Time allowed: 2 hrs 30 min
Max Marks: 50

Roll No: _____

Instruction: Students are required to write Roll No on every page of the question paper, writing anything except the Roll No will be treated as **Unfair Means**. In case of rough work please use answer sheet.

Sections	No. of Questions to attempt	Marks	Marks
A	3 out of 5 (Short Questions)	5 Marks each	$3 \times 5 = 15$
B	2 out of 3 (Long Questions)	10 Marks each	$2 \times 10 = 20$
C	Compulsory Case Study	15 Marks	15
		Total Marks	50

SECTION A

- A1. Consider the supply chain involved when a customer orders a book from Flipkart. Identify the push/pull boundary and two processes each in the pull/push process. [5 Marks]
- A2. Several emerging trends have directly influenced Indian retail supply chain. Analyze any recent trend with respect to its common implementation challenges. [5 Marks]
- A3. What are the some strategic, planning and operational decisions that must be taken by a low-cost furniture manufacturing company, such as Ikea? [5 Marks]
- A4. Identify two products each in the efficient and responsive supply chain categories. Identify similarities and differences in the way the supply chain for these products are managed by their respective firms. [5 Marks]
- A5. Analyze the major cost factors associated with the drop-shipping (Manufacturer storage with direct delivery) model for distribution. [5 Marks]

SECTION B

- B1. Consider yourself as an entrepreneur, you are running a start-up and selling a bakery product having short self-life. As a management graduate, how will you develop your supply chain? Analyze different supply chain drivers, such as facilities, inventory, transportation, information, sourcing, and pricing with reference to your firm. Evaluate the important role of each of its driver in creating a strategic fit between supply chain strategy and competitive strategy of a firm. [10 Marks]
- B2. Flipkart arm Ekart ties up with Apollo Pharmacy for delivery and pickup services. At the time of ordering, customers can choose the pick-up point; the product will be delivered to the store after which the customer is alerted with a four digit pin number to pick up the product. The shipments are kept at Apollo Pharmacy for five days, after which it is returned. Analyze the performance of its "distributor storage and customer pick up" distribution network in terms of its associated cost factors and service factors. [10 Marks]
- B3. Titan offers two brands of watches- Sonata and Fast Track. Sonata is targeted for a mass market while Fast track is targeted for a premium segment. Should Titan manage both brands with the same supply chain? Should they share the same warehouse, transportation, supply chain software and other assets or should Titan handle them separately in all areas of business? How the supply chain model for Sonata and Fast track will vary in terms of supply chain drivers? [10 Marks]

SECTION C

Jill's Gifts & Greetings shop order a popular New Year greeting card once a year and a popular strawberry chocolate throughout the year. The cost of the paper on which the New Year greeting card is printed is \$0.05 per card, and the cost of printing is \$0.15 per card. The company receives \$2.15 per card sold. Since the cards have the current year printed on them, unsold cards have no salvage value. Their customers are from the four areas: Los Angeles, San Francisco, New York, and Pasadena. Based on past data, the number of customers from each of the four regions is normally distributed with mean 2,000 and standard deviation 500. From the past year data, daily demand for chocolate was estimated 120 boxes, with a standard deviation of 30 boxes per day. The review period is 14 days and the lead-time is 7 days. At the time of review, 130 chocolate boxes are in stock and Jill's Gifts & Greetings shop wants to maintain 92 percent service level for chocolate boxes.

1. What is the optimal production quantity for the New Year greeting card? [6 Marks]
2. How many boxes of chocolate should be ordered? [6 Marks]
3. Which type of inventory system would you use in the following situations
 - a. Supplying your kitchen with fresh food
 - b. Purchasing a Christmas Tree
 - c. Buying gas for your car [3 marks]

Standard Normal Cumulative Probability Table

Cumulative probabilities for POSITIVE z-values are shown in the following table:

z	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
0.0	0.5000	0.5040	0.5080	0.5120	0.5160	0.5199	0.5239	0.5279	0.5319	0.5359
